Minibar concept including soup and hot chocolate

Select and enjoy

The quality of all drinks is important to us. That is why we use different boilers to match all beverage requirements in our machines. This way, we guarantee the best temperature for coffee, for preparing milk beverages and soup. Our in-house barista searches for the matching settings for the desired in-cup quality. Adaptable to taste by each user. Over and over again. All day long.

Ready in no time

Minibar: all-round and efficient

Our smallest machine has been developed to be used as a flexible overall concept. As the Minibar is designed as a coffee, soup and chocolate milk machine, the choice of beverages for the consumer can easily be expanded by placing multiple machines in a row. This gives a neat presentation and it makes maintenance effortless across the Minibar concept because of the used identical technology.

Machine features:

- ✓ Unique overall concept consisting of 3 machines for the preparation of a wide range of beverages
- ✓ Can be placed as a single machine or expandable set
- ✓ Instant soup up to 3 different flavours
- ✓ Hot chocolate with Bag-in-Box or topping
- ✓ Two coffee preparation methods: espresso and instant coffee
- ✓ Personalised branding image, illuminated

Perfect for locations with many needs

Ideal for locations with diverse demand for beverage needs. Suitable for offices, meeting rooms, company restaurants, canteens, workplaces, healthcare environments, restaurants, catering, self-service areas and other high demand locations.

All Veromatic machines are available with:

- ✓ Best in-cup quality with Barista-on-a-Stick®
- ✓ Wide range of beverage varieties
- ✓ EasySelect® beverage selection
- ✓ Customizable menu for personalization
- ✓ Separate hot water spout
- ✓ Cup sensors to prevent spillage
- ✓ Increased energy savings with VIPS®
- ✓ Automatic rinsing
- ✓ Easy maintenance and cleaning
